

PROJECT: BURGER FUEL
LOCATION: INVERCARGILL
INSTALLER: FLOORWISE
PRODUCT: EXPONA SIMPLAY NATURAL ASH

Installed in March 2016, Burger Fuel selected the easy application of Expona Simplay Planks for their new store in Invercargill.

Designers 'Greater Group NZ' chose the Polyflor Expona Simplay product due to its robust composition and suitability for a commercial premise needing to withstand high volume traffic.

The installation was completed by Floorwise and they are delighted with the overall natural look of this hardy vinyl tile.

Simplay is a loose lay product designed as a quick installation system. The functionality of the floor area is ensured by the net weight and the innovative special backing structure of the Simplay product allowing for

an uncompromising loose installation. Ideal for retail, hotel and office fit-outs as well as for the home, the collection features timber inspired planks and concrete look tiles.
