Spark Queen Street Auckland Central

PRODUCT USED: Expona Design

Another Spark store completed and this time it takes pride in being front and centre on New Zealand's largest and most well-renowned street – Queen Street.

"Akin to our previous retail Spark fit outs, the Queen Street store sure does don its own individual personality giving a nod to the prime position that it sits.

We were initially after a concrete floor for urban effect when looking at design options for this store. However after talking to benefits of concrete vs vinyl we decided to go with the vinyl option.

The staff spend a great amount of their day standing and we felt that concrete would be too hard on their joints.

Polyflor's extensive colour & texture selection of vinyl flooring made it easy to find the exact effect we were after, and we were able to find a colour that suited the stores finishes." says Christy Ormond, Retail & Hospitality Design Manager at Spaceworks.

Polyflor's Expona Design is recommended for very heavy commercial, light industrial and residential areas that require a hardwearing flooring covering.

- Featuring realistic reproductions of wood, stone & metal designs and textures available in planks & tiles
- Large collection offering a variety of shades
- Polyurethane (PUR) surface treatment to assist on-going maintenance

3mm Gauge
0.7mm wear layer
80 shades
