Product

Expona Flow
Cool Concrete 9856

Expona Flow Cool Concrete was recently installed at FSB Group in Mt Roskill. *"My client was initially looking for a polished concrete floor but the floor wasn't conducive to this. I suggested Polyflor's Expona Flow as it had a similar "polished concrete" look and would be easy to maintain. The product looks great in situ and the client is really happy with it."* says Sheree Garden, project Manager.

The Expona Flow vinyl sheet floorcovering collection is specifically designed for a wide range of commercial interiors. The contemporary and creative timber and striking abstract designs are ideal for education, healthcare, office, retail and leisure sectors, developed and presented in a practical, resilient and hygienic product construction.

The durability of Expona Flow lends itself perfectly to the demands of commercial interiors, leading with the key advantages of aesthetics and performance, with the added flexibility to meet corporate design schemes. Unique floor designs can easily be achieved by incorporating inlaid features and logos.

To further enhance the floorcovering, Expona Flow features a high quality, cross-linked polyurethane reinforcement (PUR) providing a low cost, polish-free maintenance regime for the lifetime of the product.

Anatolie Gasan of FSB Group had this to say about the install: *"Niche Flooring were excellent in recommending and finding the pattern we were looking for. Everyone who visits our showroom has commented on how amazing the vinyl is".*
